DemographicsNow

LIBRARY EDITION

As reported in Time Magazine, DemographicsNow is one of the best business Web sites, offering a wealth of comprehensive data on population, income and much more — tailored specifically for business needs.

THE GO-TO SOURCE FOR DEMOGRAPHIC INFORMATION

At today's colleges and universities, more and more students are studying entrepreneurship and business. To that end, both public and academic libraries are clamoring for up-to-date resources of demographic information. Entrepreneurs need to know, "Who are my customers?" "Where do they live?" "What do they do?" and perhaps most importantly, "Who are my competitors?" To meet this need, Gale is proud to offer DemographicsNow, a comprehensive database offering a wealth of consumer and business information.

RELIABLE, CURRENT INFORMATION

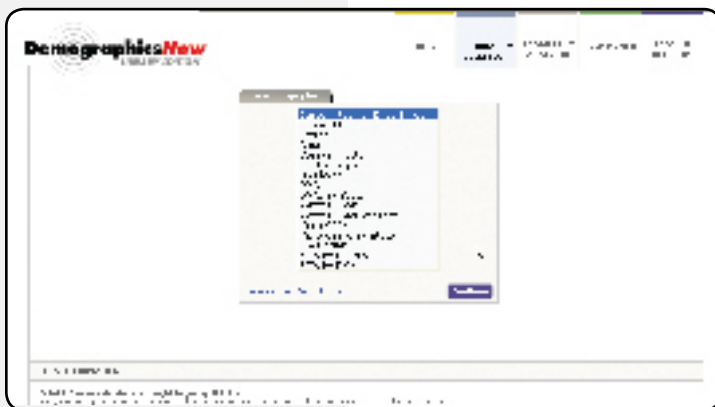

DemographicsNow offers a variety of simple, ready-to-use demographic data reports. Users may customize them by geography, choosing the area that best suits their needs. In addition, users may also run an unlimited number of reports in summary, comparison or ranking formats. From population and Census data to housing expenditures, users of DemographicsNow will have access to demographic information such as:

- Population
- Income
- Housing
- Race
- Age
- Education
- Businesses
- Retail sales
- Consumer expenditures
- And more

PUT THE DATA TO WORK FOR YOU

Time is money... that's why we've made DemographicsNow easy to search and highly intuitive. Users have instant access to site and market data by entering addresses, cities, zip codes, counties, drive times and radii information. They may choose from different reports in order to rank geographies against certain criteria. Plus, reports and maps can be easily output to a printer, or e-mailed for later retrieval. Reports are formatted in HTML, or can be saved as a PDF, an Excel or a Word document for easy off-line retrieval. And because there's no complicated login procedure, users simply select, run, save, print or e-mail the report.

▲ Executive summary reports include numerous population charts broken down by age, race/ethnicity, income, marital status and more.

▲ Demographic comparison reports demonstrate changes in number of households, population size and more, based on past Census data and future projection.
